PROFESSIONAL SUMMARY

Supply Chain and Procurement Analyst with hands-on U.S. experience directing demand, supply, and new-product-introduction planning at BioBuild, complemented by SAP IBP and S&OP reporting automation at the University of Maryland, Baltimore County. Prior experience includes SAP IBP and S&OP leadership across three business units at Barclays and enterprise resource planning implementation at Capgemini, where contributions delivered a 35% improvement in forecast accuracy, \$200K in prevented supply disruptions, and a Python-driven model that identified \$48M in unrealized revenue. Proficient in demand and supply planning, strategic sourcing, procurement, vendor management, and spend analysis, with technical expertise in SAP IBP, SAP S/4HANA, SQL, Python, and Power BI applied across new-product-introduction planning, scenario analysis, and inventory optimization.

PROFESSIONAL EXPERIENCE

Supply Chain Analyst Intern - Procurement | BioBuild

Feb 2026 - May 2026

- Coordinated demand, supply, and capacity planning for 2 new product introductions (NPI) across operations, finance, and sourcing, achieving 78% on-time material availability and zero supply-related launch delays.
- Built DRP logic aligning supplier lead times and vendor commitments with production schedules, improving on-time material availability by 25% across 3 programs and surfacing capacity constraints 2 weeks before impact.
- Developed Excel-based scenario planning models across 3 demand-variance cases, enabling leadership to compare supply and purchasing options and avoid \$50K in reactive procurement costs.
- Led RFQ and bid evaluation for 4 packaging and raw-material suppliers across 2 NPI launches, negotiating terms that cut per-unit input costs by 8% and secured backup capacity for high-risk components.

Skills Used: Advanced Excel, ERP Systems, DRP, Scenario Planning, MRP

Supply Chain Data Analyst | University of Maryland, Baltimore County

Jan 2025 - May 2026

- Engineered SQL pipelines and Power BI dashboards to automate IBP/S&OP reporting, cutting reporting cycle time 25%, reducing manual error rates 90%, and improving planning visibility for leadership.
- Reconciled 200+ planning data inconsistencies spanning 3 years of legacy records using Python, eliminating recurring audit exceptions and strengthening data governance for downstream sourcing and planning decisions.
- Automated Excel demand tracking with Power Query and VBA, freeing 40% of analyst capacity for exception management, scenario analysis, and higher-value S&OP decision support.

Skills Used: SQL, Power BI, Python, Advanced Excel (VBA, Power Query), Data Governance

Supply Chain Consultant | Barclays

Jun 2022 - Jul 2024

- Owned SAP IBP demand planning for 3 business units, folding sales trends, seasonality, and promotional inputs into statistical forecasts to improve forecast accuracy 15% and cut consensus planning effort 40%.
- Facilitated monthly S&OP alignment across statistical forecast, commercial input, and operational constraints, reducing stockout incidents 18% and lowering inventory carrying cost by \$50K annually.
- Built Python and Power BI scenario models quantifying demand variance and supply-risk exposure, informing leadership decisions that averted an estimated \$200K in supply disruption cost.
- Led category management and root-cause analysis across 10+ direct and indirect procurement categories, running competitive bid evaluations with 15+ suppliers that consolidated spend and delivered \$180K in annual cost savings.
- Built a Power BI purchase order and spend-tracking dashboard across 10+ procurement categories, giving category managers real-time visibility into open POs and helping reduce maverick spend by 12%.

Skills Used: SAP IBP, Python, Power BI, Advanced Excel, Statistical Forecasting

Associate Procurement Analyst | Capgemini

Oct 2020 - May 2022

- Supported a greenfield SAP S/4HANA and IBP planning implementation serving 450+ users across 25 sourcing categories — standardizing end-to-end planning processes, integrating S&OP/IBP, and running hypercare with no critical post-go-live planning defects.
- Maintained ERP planning master data (material master, MRP type, lot size, lead time, safety stock) across a landscape processing 1.2M+ monthly transactions, partnering with IT and procurement to cleanse parameters and reduce processing errors 40%.
- Ran structured supply-risk reviews across 10+ commodity categories, flagging shortages 2-3 weeks earlier than the prior reactive baseline and presenting scenario-based mitigation and sourcing options to leadership.
- Coordinated RFP and vendor bid evaluations for 12+ suppliers across 3 commodity categories during the S/4HANA rollout, consolidating the vendor base by 20% and improving on-time delivery performance by 15%.

Skills Used: SAP S/4HANA, SAP IBP, MRP, Advanced Excel, ERP Master Data Management

PROJECTS

AI-Powered Supplier Risk Scanner

Built an AI-powered MVP that researches any supplier by name and automatically flags labor, environmental, financial, legal, and sanctions red flags using public web data. AI agents handle search and extraction, a rule-based scoring system structures the findings, and results export to CSV and feed a dashboard for at-a-glance supplier comparison.

AI-Driven Demand Forecasting and Scenario Planning Model

Built a Python LP optimization and demand forecasting model using 20 quarters of ERP data, reducing forecast MAPE from 28% to 12.5% and identifying \$48M in unrealized revenue across 17 supply chain variables.

SKILLS

Supply Chain & Procurement: Supply Chain Management, Demand & Supply Planning, S&OP / IBP, Strategic Sourcing, Procurement, Purchasing, Vendor & Supplier Management, Spend Analysis, Contract Negotiation, Category Management, Purchase Order Management, Supplier Risk Management, Inventory Optimization, NPI Planning, DRP, Safety Stock, MRP

Analytics & Business Impact: Forecast Accuracy (MAPE), Statistical Forecasting, Root Cause Analysis, KPI Reporting & Dashboards, Data Visualization, Cost Reduction, Cross-Functional Collaboration, Stakeholder Management, Data Governance, Process Improvement

Systems & Tools: SAP IBP, SAP S/4HANA, SAP MM, SAP SCM/APO, SAP Ariba, Blue Yonder, SQL, Python, Power BI, Tableau, Advanced Excel (VBA, Pivot Tables, Power Query), Power Automate, AWS (S3, Glue, Athena), Airtable, ClickUp

EDUCATION & CERTIFICATION

University of Maryland, Baltimore County (UMBC) — MS, Engineering & Industrial Management

Anna University — B.E., Electronics Engineering

May 2026

June 2020
